

## Outdoor Long Range 802.11ac Wave-2 Wi-Fi Access Point

## GWN7600LR

This long range Wi-Fi access point is designed to provide extended coverage support and is ideal for outdoor Wi-Fi solutions thanks to its waterproof casing and heat resistant technology. The GWN7600LR comes equipped with dual-band 2x2:2 MU-MIMO with beam-forming technology and a sophisticated antenna design for maximum network throughput and extended Wi-Fi coverage range of up to 300 meters. To ensure easy installation and management, the GWN7600LR uses a controller-less distributed network management design and an embedded controller within the product's web user interface. This allows each access point to manage a network of up to 30 GWN APs independently without needing separate controller hardware/software and without a single point-of-failure. Its easy installation and management features packed with extra coverage support and advanced performance features, make the GWN7600LR an ideal outdoor access point for mid-size wireless network deployments.

1.27Gbps wireless throughput and 2x Gigabit wireline ports

Dual-band 2x2:2 MU-MIMO with beamforming technology

Support 802.3af and 802.3at Power-over-Ethernet (PoE/PoE+)

Support 450+ concurrent Wi-Fi client devices

Up to 300-meter coverage range

Advanced QoS to ensure real-time performance of low-latency applications

Anti-hacking secure boot and critical data/control lockdown via digital signatures, unique security certificate/random default password per device

Embedded controller can manage up to 30 local GWN series APs; GWN.Cloud offers unlimited AP management; GWN Manager offers premise-based software controller
